

Hi, my name is Pete, about three and a half years ago I had a serious accident that left me with a few broken bones and permanent nerve damage to my right shoulder so I was told by doctors. This damage made my shoulder drop considerably and caused my shoulder blade to stick out when I tried to lift my arm, I had no strength in my arm and a lot of pain in my back and shoulder and haven't worked since as I found it very difficult to get back into some form of employment because of my condition. I then saw Peter's add in the newspaper and thought, what have I got to lose, might as well give him a look at it as I hadn't had much luck with doctors. Peter took one look at it and new straight up that the problem wasn't nerve damage, so he went to work on my shoulder and the results were instant. Within a couple of weeks you wouldn't know that I had even had a bad shoulder, I could lift things once again, had full strength in my arm and was pain free. I am now feeling more confident in getting back into full time employment as I now feel like a different man. So if you've got an ache or pain that no one else has been able to fix I recommend you give Peter a call, I'm pleased I did.

Hi Peter, here's a bit of a letter for you I hope its ok, feel free to edit it any way you see fit. Thanks again for your help I feel like a new man even though it did hurt a bit (alright a lot) when you put the tendon back in its place. I will give you a call in a month or two and let you know how I'm going.

Regards Peter Murray
